

Vibrating Sander

To certify on the vibrating sander you will need to know:

1. The safety rules.
2. The parts of the Vibrating sander.

Vibrating sander safety rules.

1. Wear eye protection
2. Let the weight of the sander do the work. Do not apply excessive pressure on the sander.
3. Sanding on narrow edges will tear the abrasive paper and round off the edges of your wood.
4. Keep the sander held in a flat position while sanding. Do not tilt on one end or the other.
5. Start the sander off your project then lower it to the surface.
6. Lift the sander off your project prior to stopping it. (This will help prevent getting swirl marks on the surface of your project.)

Parts of the vibrating sander.
